# EUROPEAN ZODIAC

## IN THE LIGHT OF THE GLOBAL ECONOMIC CRISIS

**KLAUDIO ZIC**

*Academy for RTRRT and Scientific Astrology*

### ABSTRACT

The Academy of Scientific Astrology is based on astronomic principles confirming to the IAU convention. The calculations are performed on the HORIZONS integrator by Jon Giorgini of NASA JPL, Pasadena CA.

*Subject headings:* solar system – Academic Zodiac, astronomy – precession, religion – planetary exorcism

*Online material:* [www.lulu.com/astrology](http://www.lulu.com/astrology) <http://youtube.com/astrology2012> <http://youtube.com/RTRRTV>

*1Th 5:3 When they may say, Peace and safety, then sudden destruction comes upon them, as travail upon her that is with child; and they shall in no wise escape.*

### 1. MOTIVATION

A zodiac is more than a calendar and as such important for every civilization. For the first time in European history, we do have a zodiac of our own as firmly based on astronomic principles. The Academic Zodiac was conclusively introduced in the year 2006, after a turbulent\* period of research. We had to learn many things that were unknown to our predecessors, namely, what is a planet? Which constellations are spanned by the Moon<sup>†</sup>? Does Venus enter zodiacal Auriga? In counting the zodiacal stations, we came to an interesting number, 22. The impact that the Academic Zodiac is bound to make on planetary consciousness is exorcising in its importance<sup>‡</sup>. This is the first time in human history that we feel comfortable with the zodiac. Prior to the determination of the Academic Zodiac, we have left our zodiacal problems in the hands of superstition. Many scientists did not even know that there is a zodiacal position such as Moon in Auriga or Venus in Scutum. In fact, many did not know the position of the Sun. A brief ephemeris strip will show that the Sun is in Libra on November 23<sup>rd</sup>, and thus shortly put an end to millenary superstition<sup>§</sup>. Precession will put light on the factual ascendants as rising at east, since it determines the circular flow of

eastern ascendants. The number of the eastern ascendant is 16 for the current epoch. This problem was never treated before in any astrology. The universal Cartesian house system as operating on spacecraft, under water or through alien galaxies\*\* solved the housing problem for the next generation<sup>††</sup>.

### 2. PROBLEM

Can we predict and avert world economy crisis, even in midst of financial meltdown? Our answer is *yes* at the personal and even collective level. The answer lies within excellent prediction, along with reality rendering<sup>‡‡</sup>. There may be alternatives to market analysis through the apparently well-known world of predictive astrology. Superstition was never good at determining anything but its own reach into the superstitious mind. As soon as there is no superstitious mind<sup>§§</sup> at all, superstition loses its reach and diabolic purpose. In order to determine the peaks of the global economic crisis, we needed the appropriate tools. Luckily, those tools were ready at the time when crisis started. The first serious peak was determined for mid August 2007. The Academic Zodiac was defined one

year before the event. A decade before Venus entered Hydra, we determined its impact upon world economy. Albeit Venus in Hydra is a comparatively rare zodiacal event, what stirred our concern was the synchronicity<sup>\*\*\*</sup> of 2002 AW<sub>197</sub> in Hydra<sup>†††</sup>, in diving down from Cancer as if to meet Venus there.

### 3. APPROACH

The zodiac we use is the astronomic zodiac. Astronomy is a reliable science in determining the real position of the planets<sup>\*\*\*</sup> against a conventional zodiac. Thus, the astronomic zodiac confirms very well to the historical ones. Europe's legacy is mainly the Greek zodiac, which was in turn inherited from older civilizations. This zodiac was never perfected until 2006, when the Academic Zodiac was finally defined. The zodiacal positions such as Venus in Hydra, Mercury in Orion or Moon in Auriga were delineated much before year 2006. The year 2006 defined the zodiac by simply taking out one planet, namely Pluto, which was demoted from its planetary position. The demotion of Pluto made for a compact astronomic zodiac as consisting of only 22 IAU constellations. The historical zodiacs include the P1, P2, X, G, N1, N2, M and E zodiacs. If 2003 UB313 were to be proclaimed planet, we would need to expand the zodiac towards more than 40 constellations. Nowadays the recent position of Pluto in Serpens Cauda is not treated as zodiacal, but rather a P-zodiacal position, in conformity to our recent studies. Note that Serpens Cauda remains one of the 16 eastern ascendants for the current epoch, most prominently as the historical ascendant of the USA. Conversely, Eris in Sculptor is an X-zodiacal position.

### 4. RESULTS

The results of our research are enlisted as follow.

- ❖ The formula “As above, so below” can be applied in genuine astrological prediction.
- ❖ Resonance between a stellar and earthly event is intercepted with excellent timing.
- ❖ Market trends can be predicted to the minute within the Academic Zodiac environment.
- ❖ The Academic Zodiac with its 22 zodiacal stations is a reliable scientific environment in which to place accurate market predictions. Enterprise, traders and talents<sup>§§§</sup> are precisely determined according the true positions of the planets in the real sky.
- ❖ One of the world economic crisis peaks is determined by the entrance of Venus in Hydra, along with giant real estate cubewano 2002 AW<sub>197</sub>.
- ❖ Superstition is not scanning the real sky, and thus useless in market analysis.
- ❖ The dwarf planets<sup>\*\*\*\*</sup> offer the means for the accurate prediction of market trends<sup>††††</sup>.
- ❖ The accurate positioning of an object in the real sky, that is, against the Academic Zodiac makes for enhanced precision in astrological market prediction.
- ❖ Whether within the 2004 ~ 2018 span, or the larger 1999 ~ 2085 period, there are several ways in determining crisis peaks, globally, as well as in particular study cases.
- ❖ Personal as well as global prosperity is rendered at will<sup>\*\*\*\*†</sup>.

### 5. DISCUSSION

The scientific zodiac is an excellent aide in personal as well as global prosperity rendering.

---

\* The times were market with the great trans-Neptune discoveries of our time. 2003 UB<sub>313</sub> Eris has been found larger than Pluto, resulting in the demotion of Pluto from planetary status. These dramatic changes affected the definition of the Academic Zodiac.

† The lunar zodiac as differing from solar or planetary, was published in a separated publication, as elaborating upon the *Secret Mansions of the Moon*. <http://hulu.com/astrology>

‡ Science and exorcism go hand in hand in eliminating superstition and the devil from racial mind and this planet. Thus the reality rendering is planetary exorcism, but also the Academic Zodiac exorcises superstition.

\*\* See our elaboration on the *local zodiacs*, especially as presented within *Planetocentric Astrology*.

†† In referring to *Planetocentric Astrology*, the next generation is seen as colons on Cruithne, with Sun in Draco births. Previous house systems had housing problems already at Oslo latitude. Altitude and depression were never entered as they were discarded completely from astrological calculus, thus thwarting topocentric precision. An astrologer had no way in analyzing an underwater quake. Venus in Hydra rising at minus three miles was an unknown event.

‡‡ Reality rendering is primarily personal, but one can change occurrence on the global scale as well.

§§ An invitation towards the total annihilation of the superstitious mind on global scale. The destruction of psyche as parasite and liberation of the 144000.

\*\*\* Jupiter in Ophiuchus and the timely appearance of Palden Dorje acted in messianic ways for the benefit of the planet. In averting the diabolic implications of Venus in Hydra, Palden Dorje emerged with a historical sermon, right before Venus entered Hydra.

††† 2002 AW<sub>197</sub> is a giant cubewano object, or dwarf planet, that has been found significant in determining the passage of great portions of real estate from hand to hand. Its presence in Hydra alludes at sub-currents, even shadow market.

‡‡‡ The stress is on the real positions of the planets against those as fancied by dangerous superstition.

§§§ Alice, August 4<sup>th</sup> 2004. Ascendant Cetus. Moon in Cetus rising. Mercury in Sextans along with Venus in Orion. Juno in *zodiacal* Scutum and Pluto in P-zodiacal Serpens Cauda, the ascendant of the USA. These data for a talented child are simply unavailable through popular superstition.

\*\*\*\* Orcus and 2002 AW<sub>197</sub> were particularly busy in this period.

†††† See *Orcus Report 2004 ~ 2018*.

‡‡‡‡ Reality rendering offers many possibilities in changing occurrences as one see fit.
